# **INDEPENDENT AUDITOR'S REPORT**

Board of County Road Commissioners Otsego County Road Commission 669 West McCoy Road Gaylord, Michigan 49734

# **Report on the Financial Statements**

We have audited the accompanying financial statements of the governmental activities, major fund and the aggregate remaining fund information of the Otsego County Road Commission (a component unit of Otsego County, Michigan) as of and for the year ended December 31, 2018, and related notes to the financial statements, which collectively comprise the Road Commission's basic financial statements as listed in the table of contents.

# Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

# Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance aboutwhether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

# **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, major fund and the aggregate remaining fund information of the Otsego County Road Commission, as of December 31, 2018, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

# **Other Matters**

# Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, employee retirement and benefit systems, budgetary comparison schedules on pages 4 through 8, pages 35 through 42 and pages 43 through 44 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquires of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquires, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

# Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Otsego County Road Commission's basic financial statements. The schedules of analysis are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements themselves, and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedules are fairly stated in all material respects, in relation to the basic financial statements as a whole.

Board of County Road Commissioners Otsego County Road Commission

# Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our reports dated May 21, 2019, on our consideration of the Otsego County Road Commission's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Otsego County Road Commission's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Otsego County Road Commission's internal control over financial reporting and compliance.

Management's Discussion and Analysis

# Management's Discussion and Analysis December 31, 2018

# **Using This Annual Report**

The Otsego County Road Commission's discussion and analysis is designed to: (a) assist the reader in focusing on significant financial issues; (b) provide an overview of the Road Commission's financial activity; (c) identify changes in the Road Commission's financial position (its ability to address the next and subsequent year challenges); (d) identify any material deviations from the approved budget; and (e) identify any issues or concerns.

#### **Reporting the Road Commission as a Whole**

The statement of net position and the statement of activities report information about the Road Commission as a whole and about its activities in a way that helps answer the question of whether the Road Commission as a whole is better off or worse off as of a result of the year's activities. These statements include all assets, deferred outflows of resources, liabilities and deferred inflows of resources using the accrual basis of accounting, which is similar to the accounting method, used by most private-sector companies. All of the year's revenues and expenses are taken into account regardless of when cash is received or paid.

The two statements mentioned above, report the Road Commission's net position and the changes in them. The reader can think of the Road Commission's net position (the difference between assets, deferred outflows of resources, liabilities and deferred inflows of resources) as one way to measure the Road Commission's financial health or financial position. Over time, increases or decreases in the Road Commission's net position are one indicator of whether its financial health is improving or deteriorating.

#### **Reporting the Road Commission's Major Fund**

Our analysis of the Road Commission's major fund begins on page 11. The fund financial statements begin on page 45 and provide detailed information about the major fund. The Road Commission currently has only one major fund, the general operations fund, in which all of the Road Commission's activities are accounted. The general operations fund is a governmental fund type.

- Governmental funds focus on how money flows into and out of this fund and the balances left at year end that are available for spending. This fund is reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the Road Commission's general governmental operations and the basic service it provides. Governmental fund information helps the reader to determine whether there are more or fewer financial resources that can be spent in the near future to finance the Road Commission's services. We describe the relationship (or differences) between governmental activities (reported in the statement of net position and the statement of activities) and the governmental fund in a reconciliation following the fund financial statements.
- Fiduciary fund The Road Commission is trustee, or fiduciary, for its employees' health care plan. The Road Commission is responsible for ensuring that the assets reported in the fiduciary funds are used for their intended purposes. All of the Road Commission's fiduciary activities are reported in a separate statement of fiduciary net position and a statement of changes in fiduciary net position. We exclude these activities from the Road Commission's government-wide financial statements because the Road Commission cannot use these assets to finance its operations.

# Management's Discussion and Analysis December 31, 2018

# The Road Commission as a Whole

The Road Commission's Net Position increased 29.71% from \$22,439,552 to \$29,106,090 for the year ended December 31, 2018. The Net Position and Change in Net Position are summarized below.

Unrestricted Net Position increased \$3,493,107. The primary reasons were related to OPEB liabilities and state funding.

Net Position as of the years ended December 31, 2018 and 2017 follows:

|  | Governmen                  | Governmental Activities    |  |  |  |

A summary of Changes in Net Position for the years ended December 31, 2018 and 2017 follows:

# The Road Commission's Fund

The Road Commission's general operations fund is used to control the expenditures of Michigan Transportation Fund monies distributed to the County which are earmarked by law for road and highway purposes.

For the year ended December 31, 2018, the fund balance of the general operations fund increased \$324,600 as compared to an increase of \$1,624,869 in the fund balance for the prior year. Total revenues were \$11,902,644, an increase of \$1,493,538 as compared to last year. This change in revenues resulted primarily from state sources.

Total expenditures were \$11,578,044, an increase of \$2,811,807. The increase is largely due to primary road expenditures and capital outlay.

# Management's Discussion and Analysis December 31, 2018

# **Budgetary Highlights**

Prior to the beginning of any year, the Road Commission's budget is compiled based upon certain assumptions and facts available at that time. During the year, the Road Commission board acts to amend its budget to reflect changes in these original assumptions, facts and/or economic conditions that were unknown at the time the original budget was compiled. In addition, by policy, the board reviews and authorizes large expenditures when requested throughout the year.

The revenue budget for 2018 was \$954,931 more than the actual receipts. This was due, in part, to the projection of federal grants. The Road Commission budgets for the receipt of funds for projects on primary and local roads as earned.

Road Commission expenditures were projected at \$11,896,200 while actual expenditures were \$11,578,044. This resulted in total expenditures being under budget by \$318,156. There were several items that account for the variance in the projection of the budget.

#### **Capital Assets**

As of December 31, 2018 and 2017, the Road Commission had invested in capital assets as follows:

|   |           | 2018         |           | 2017         |
|---|-----------|--------------|-----------|--------------|
| Capital Assets Not Being Depreciated<br>Land and Improvements | \$        | 11,647,119   | \$        | 10,889,984   |
| Other Capital Assets  |           |              |           |              |
| Buildings   |           | 3,936,130    |           | 3,936,130    |
| Road Equipment  |           | 7,656,680    |           | 7,093,391    |
| Other Equipment and Assets                                    |           | 164,088      |           | 174,307      |
| Infrastructure  |           | 35,110,983   |           | 33,503,417   |
| Total Capital Assets at Historic Cost                         |           | 58,515,000   |           | 55,597,229   |
| Total Accumulated Depreciation                                |           | (22,464,135) |           | (21,748,717) |
| Total Net Capital Assets                                      | <u>\$</u> | 36,050,865   | <u>\$</u> | 33,848,512   |
| Major additions included the following:                       |           |              |           |              |
| Land Improvements   | <u>\$</u> | 757,135      | <u>\$</u> | 994,034      |
| Various Resurfacing Projects and Bridges                      | <u>\$</u> | 2,881,339    | \$        | 2,052,184    |
| Trucks/Equipment/Other  | \$        | 877,895      | \$        | 379,059      |

#### <u>Debt</u>

The Road Commission currently has long-term debt in the amount of \$12,589,860 which represents bond payments, bank loans, equipment financing, net pension liabilities, health benefit obligations, and vested employee benefits.

# Management's Discussion and Analysis December 31, 2018

# **Economic Factors and Next Year's Budget**

The Board of County Road Commissioner's considered many factors when setting the fiscal year 2019 budget. One of the factors is the economy. The Road Commission derives approximately 60% of its revenues from the fuel tax collected. The economic changes have resulted in stable consumption of fuel and consequently stable Michigan Transportation Funds to be distributed. As an increase in funding occurs, road projects will be increased.

The board realized, and the reader should understand, that there are not sufficient funds available to repair and/or rebuild every road in Otsego County's transportation system. Therefore, the board attempts to spend the public's money wisely and equitably and in the best interest of the motoring public and the citizens of the County.

# **Contacting the Road Commission's Financial Management**

This financial report is designed to provide the motoring public, citizens and other interested parties a general overview of the Road Commission's finances and to show the Road Commission's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the Otsego County Road Commission administrative offices at 669 W. McCoy Road, P.O. Box 537, Gaylord MI 49734.

Notes to Financial Statements

# NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the Otsego County Road Commission conform to accounting principles generally accepted in the United States of America (GAAP) as applicable to governmental units. The following is a summary of the significant accounting policies used by the Otsego County Road Commission.

# A. Reporting Entity

The Otsego County Road Commission, which is established pursuant to the County Road Law (MCL 224.1), operates under an elected board of five (5) County Road Commissioners who establish policies and review operations of the Road Commission. An alternating Road Commissioner is elected biannually to serve a six-year term.

The criteria established by the Governmental Accounting Standards Board 61, "The Financial Reporting Entity," for determining the reporting entity includes oversight responsibility, fiscal dependency and whether the financial statements would be misleading if the component unit data were not included. Based on the above criteria, these financial statements present the Otsego County Road Commission, a discretely presented component unit of Otsego County.

The Road Commission Operating Fund is used to control the expenditures of Michigan Transportation Fund moneys distributed to the County, which are earmarked by law for street and highway purposes. The Board of County Road Commissioners is responsible for the administration of the Road Commission Operating Fund.

#### B. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the activities of the Otsego County Road Commission. There is only one fund reported in the government-wide financial statements.

The statement of net position presents the Road Commission's assets, deferred outflows of resources, liabilities and deferred inflows of resources with the difference being reported as either invested in capital assets or restricted net position.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment; and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenue.

Separate financial statements are provided for the operating fund (governmental fund). The operating fund is an independent fiscal and accounting entity with a self-balancing set of accounts. Fund accounting segregates funds according to their intended purpose and is used to aid management in demonstrating compliance with finance-related legal and contractual provisions. Major individual governmental funds are reported as separate columns in the fund financial statements. The operating fund is the only major fund of the Commission.

#### C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenue is recognized as soon as it is both measurable and available. Revenue is considered to be available if it is collected within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Michigan transportation funds, grants, permits, township contributions and interest associated with the current fiscal period are all considered to be susceptible to accrual and have been recognized as revenue of the current fiscal period. All other revenue items are considered to be available only when cash is received by the government. Under the terms of grant agreements, the Commission funds certain programs by a combination of specific cost-reimbursement grants, categorical block grants, and general revenues. Thus, when program expenses are incurred, there is both restricted and unrestricted net position available to finance the program. It is the Commission's policy to first apply cost-reimbursement grant resources to such programs, followed by categorical block grants, and then by general revenues.

# D. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance

#### Cash, Equivalents and Investments

Cash and equivalents are considered to be cash on hand, demand deposits and short-term investments with a maturity of three months or less when acquired. All deposits are recorded at cost.

#### Inventories

Inventories are priced at cost as determined on the average unit cost method. Inventory items are charged to road construction and maintenance, equipment repairs and operations as used.

#### Prepaid Items

Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid items in both the government-wide and fund financial statements.

# Property Taxes Receivable

The property tax is levied each December 1st. on the taxable valuation of property located in the County as of the preceding December 31st. The 2018 taxable valuation of \$1,258,730,002 for Road Millage amounted to \$1,258,730 less \$170,985 for cities and villages, (on which ad valorem taxes of 1.0000 mills were levied) for road maintenance purposes resulted in a net total of \$1,087,745.

In the government-wide financial statements, the tax is recorded as revenue when the tax is levied in the current year. Although the County's 2018 ad valorem tax is levied and collectible December 1, 2018, it is the Road Commission's policy to recognize revenues from the current tax levy in the subsequent year. When the proceeds of this levy are budgeted and made available for the financing of the Road Commission's operations in the governmental fund financial statements. The tax receivable is offset to deferred inflows.

#### Capital Assets

Capital assets, which include property, plant, equipment, infrastructure assets (e.g., roads, bridges and similar items), are reported in the operating fund in the government-wide financial statements. Capital assets are defined by the Otsego County Road Commission as assets with an initial individual cost of more than \$1,000 and/or an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost of purchase or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

#### Depreciation

Depreciation is computed on the sum-of-the-years'-digits method for road equipment and straight-line method for all other assets. The depreciation rates are designed to amortize the cost of the assets over their estimated useful lives as follows:

| Buildings                | 30 to 50 years |
|--------------------------|----------------|
| Road Equipment           | 5 to 8 years   |
| Shop Equipment           | 10 years       |
| Engineers' Equipment     | 3 to 10 years  |
| Office Equipment         | 4 to 10 years  |
| Infrastructure – Roads   | 8 to 30 years  |
| Infrastructure – Bridges | 12 to 50 years |

#### Deferred Outflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Road Commission has pension and OPEB items that qualify for reporting in this category.

# Deferred Inflows of Resources

In addition to liabilities, the statement of net position and governmental funds balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Road Commission has property taxes that qualify for reporting in this category.

#### Pension and Other Post Employment Benefits

For purposes of measuring the net pension and OPEB liability, deferred outflows of resources and deferred inflows of resources and fringe expense, information about the fiduciary net position of the Plans and additions to/deductions from the fiduciary net position have been determined on the same basis as they are reported by the actuary. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

#### Long-Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the operating fund statement of net position.

#### Vested Employee Benefits (Vacation and Sick Leave)

Substantially all employees of the Road Commission can accumulate vacation hours based on years of service from 40 hours to 200 hours of paid time off. Sick leave is paid up to 350 hours upon retirement or upon death. Sick leave is earned at 8 hours per month for union employees. Vacation leave and sick leave amounted to \$90,698 and \$161,520 respectively.

#### Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, outflows, liabilities and inflows, and affect the disclosure of contingent assets and liabilities at the date of the financial statements. These estimates and assumptions also affect the reported amounts of revenue and expenditures during the reporting period. Actual results could differ from those estimates.

# Fund Balance Classification

The governmental fund financial statements present fund balances based on classifications that comprise a hierarchy that is based primarily on the extent to which the Road Commission is bound to honor constraints on the specific purposes for which amounts in the respective governmental funds can be spent. The classifications used in the governmental fund financial statements are as follows:

- <u>Nonspendable</u>: This classification includes amounts that cannot be spent because they are either (a) not in spendable form or (b) are legally or contractually required to be maintained intact. The Road Commission has classified inventories as being Nonspendable as these items are not expected to be converted to cash within the next year.
- <u>Restricted</u>: This classification includes amounts for which constraints have been placed on the use of the resources either (a) externally imposed by creditors (such as through a debt covenant), grantors, contributors, or laws or regulations of other governments, or (b) imposed by law through constitutional provisions or enabling legislation.

- <u>Committed</u>: This classification includes amounts that can be used only for specific purposes pursuant to constraints imposed by formal action of the Board. These amounts cannot be used for any other purpose unless the Board removes or changes the specified use by taking the same type of action that was employed when the funds were initially committed. This classification also includes contractual obligations to the extent that existing resources have been specifically committed for use in satisfying those contractual requirements.
- <u>Assigned</u>: This classification includes amounts that are constrained by the Board's intent to be used for a specific purpose but are neither restricted nor committed. This intent can be expressed by the Board through the budgetary process. This classification also includes the remaining positive fund balance for all governmental funds except for the General Fund.
- <u>Unassigned</u>: This classification includes the residual fund balance for the General Fund. The unassigned classification also includes negative residual fund balance of any other governmental fund that cannot be eliminated by offsetting of Assigned fund balance amounts.

The Board would typically use Restricted fund balances first, followed by Committed resources, and then Assigned resources, as appropriate opportunities arise, but reserves the right to selectively spend Unassigned resources first to defer the use of these other classified funds.

# NOTE 2 - STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

# **Budgetary Procedures**

Budgetary procedures are established pursuant to PA 2 of 1968, as amended, which requires the County Board of Road Commissioners to approve a budget for the County Road Fund. The Manager prepares a budget in accordance with the Act which is adopted by the Board at a public hearing each December. All budgets lapse at fiscal year end. Any violations of the Act are indicated on page 44.

# NOTE 3 - CASH AND EQUIVALENTS

Michigan Compiled Laws, Section 129.91, authorizes the Road Commission to deposit and invest in the accounts of federally insured banks, credit unions, and savings and loan associations; bonds, securities and other direct obligations of the United States, or any agency or instrumentality of the United States; United States government or federal agency obligation repurchase agreements; banker's acceptance of United States banks; commercial paper rated within the two highest classifications, which mature not more than 270 days after the date purchased; obligations of the State of Michigan or its political subdivisions which are rated as investment grade; and mutual funds composed of investment vehicles which are legal for direct investment by local units of government in Michigan. Financial institutions eligible for deposit of public funds must maintain an office in Michigan.

# Notes to Financial Statements December 31, 2018

# NOTE 3 - CASH AND EQUIVALENTS (Continued)

The Road Commission has adopted an investment policy, which is in accordance with the provisions of Public Act 196 of 1997.

|  |           | Carrying<br>Amount            | Ι         | Financial<br>Institution<br>Balance |
|--|-----------|-------------------------------|-----------|-------------------------------------|
| Petty Cash<br>Bank Deposits (Checking and Savings Accounts)<br>Investments at Fair Value | \$        | 700<br>1,256,193<br>2,191,863 | <u>\$</u> | 1,254,312                           |
| Total Cash and Equivalents   | <u>\$</u> | 3,448,756                     |           |                                     |

*Interest rate risk.* The Road Commission does have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

*Credit risk.* State law limits investments in commercial paper, corporate bonds, and mutual bond funds to the top two ratings issued by nationally recognized statistical rating organizations. The Road Commission has an investment policy that could further limit its investment choices.

*Custodial deposit credit risk.* Custodial deposit credit risk is the risk that in the event of a bank failure, the Road Commission's deposits may not be returned. State law does not require and the Road Commission does not have a policy for deposit custodial credit risk. As of year end, \$754,312 of the Road Commission's bank balance of \$1,254,312 was exposed to credit risk because it was uninsured and uncollateralized.

*Custodial investment credit risk.* Investment custodial credit risk is the risk that in the event of the failure of the counterparty, the Commission will not be able to recover the value of its investments or securities that are in the possession of an outside party. The Commission invests with the County of Otsego and would receive its proportional share of holdings.

*Fair value measurement.* The Commission categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. Investments that are measured at fair value using the net asset value per share (or equivalent) as a practical expedient are not classified.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Commission's assessment of the significance of particular inputs to these fair value measurements required judgment and considers factors specific to each asset or liability. The Road Commission had the following investments as part of the Otsego County pool or separately owned:

| Investment Type   | Fair<br>Value           | Level 1   | Level 2             | Level 3           | Credit<br>Rating | Concen-<br>tration |
|---|-------------------------|-----------|---------------------|-------------------|------------------|--------------------|
| Fixed Income Debt Securities:<br>U.S. Government<br>Other | \$ 1,691,863<br>500,000 | \$        | \$ 1,691,863        | \$                | AA+<br>Unrated   | 77%<br>23%         |
|   | <u>\$ 2,191,863</u>     | <u>\$</u> | <u>\$ 1,691,863</u> | <u>\$ 500,000</u> |                  |                    |
| OPEB Trust Pool   | <u>\$ 490,210</u>       | <u>\$</u> | <u>\$ 490,210</u>   | <u>\$</u>         | Unrated          | 100%               |

| Total Depreciation Expense   | <u>\$</u> | 2,313,905 |

# NOTE 5 - EMPLOYEE RETIREMENT AND BENEFITS SYSTEMS

#### Description of Plan and Plan Assets

The Road Commission is in an agent multiple-employer defined benefit pension plan with the Municipal Employees' Retirement System (MERS). The system provides the following provisions: normal retirement, deferred retirement and service retirement to plan members and their beneficiaries. The service requirement is computed using credited service at the time of termination of membership multiplied by the sum of 2.50% times the final compensation (FAC). The most recent period of which actuarial data was available was for year ended December 31, 2017.

#### General Information about the Pension Plan

*Plan Description.* The employer's defined benefit pension plan provides certain retirement, disability and death benefits to plan members and beneficiaries. The employer participates in the Municipal Employees Retirement System (MERS) of Michigan. MERS is an agent multiple-employer, statewide public employee pension plan established by the Michigan Legislature under Public Act 135 of 1945 and administered by a nine-member Retirement Board. MERS issues a publicly available financial report that includes financial statements and required supplementary information. This report may be obtained accessing the MERS website at www.mersofmich.com.

# Employees Covered by Benefit Terms

At December 31, 2017, the following employees were covered by the benefit terms:

| Inactive employees or beneficiaries currently receiving benefits | 49 |
|--|----|
| Inactive employees entitled to but not yet receiving benefits    | 6  |
| Active employees   | 32 |
|  | 87 |

# **Funding Policy**

The obligation to contribute to and maintain the system for these employees was established by negotiation with the Road Commission's competitive bargaining unit and personnel policy, which require employees to contribute to the plan. The Road Commission is required to contribute at an actuarially determined blended rate for 2018 of 32.90% of nonunion payroll and 25.61% of general employees.

#### Net Pension Liability

The Road Commission's net pension liability was measured as of December 31, 2017, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date.

Actuarial Assumptions. The total pension liability in the December 31, 2017 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

| Inflation                 | 2.50 %                                     |
|---------------------------|--|
| Salary increases          | 3.75 %                                     |
| Investment rate of return | 7.75 %, net of interest and administrative |
|                           | expense including inflation                |

Mortality rates used were based on the RP-2014 Mortality Table of a 50% Male and 50% Female blend.

The actuarial assumptions used in valuation were based on the results of the most recent actuarial experience study of January 1, 2009, through December 31, 2013.

# **NOTE 5 - EMPLOYEE RETIREMENT AND BENEFIT SYSTEMS (Continued)**

The long-term expected rate of return on pension plan investments was determined using a model method in which the best-estimate ranges of expected future real rates of return (expected returns, net of investment and administrative expenses and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

|                         |                   | Long-Term Expected  |
|-------------------------|-------------------|---------------------|
| Asset Class             | Target Allocation | Real Rate of Return |
| Global Equity           | 55.5%             | 3.41%               |
| Global Fixed Income     | 18.5%             | 0.23%               |
| Real Assets             | 13.5%             | 0.97%               |
| Diversifying Strategies | 12.5%             | 0.03%               |

*Discount Rate.* The discount rate used to measure the total pension liability is 8.00% for 2017. The projection of cash flows used to determine the discount rate assumes that employer and employee contributions will be made at the rates agreed upon for employees and the actuarially determined rates for employers. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to pay all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

# **Changes in the Net Pension Liability:**

|   | Increases (Decreases) |                           |                            |           |                          |             |

# NOTE 5 - EMPLOYEE RETIREMENT AND BENEFIT SYSTEMS (Continued)

Sensitivity of the net pension liability to changes in the discount rate. The following presents the net pension liability of the Road Commission, calculated using the discount rate of 8.00%, as well as what the Road Commission's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (7.00%) or 1-percentage-point higher (9.00%) than the current rate:

|   | 1% Decrease | <b>Current Discount Rate</b> | 1% Increase |  |
|---|-------------|------------------------------|-------------|--|
|   | (7.00%)     | (8.00%)                      | (9.00%)     |  |
| Road Commission's net pension liability | \$6,999,892 | \$5,644,296                  | \$4,484,425 |  |

*Pension plan fiduciary net position*. Detailed information about the pension plan's fiduciary net position is available in the separately issued MERS financial report.

# Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended December 31, 2018, the Road Commission recognized pension expense of \$1,028,431. At December 31, 2018, the Road Commission reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

|   | Οι | Deferred<br>Itflows of<br>esources | Deferred<br>Inflows of<br>Resources |   |
|---|----|------------------------------------|-------------------------------------|---|
| Difference between expected and actual experience<br>Changes in assumptions<br>Net difference between projected and actual earnings | \$ | 429,372                            | \$                                  | - |
| on pension plan investments   |    | 322,239                            |                                     | - |
| Total   | \$ | 751,611                            | \$                                  |   |

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recorded in pension expense as follows:

| Year Ended<br>December 31: |               |
|----------------------------|---------------|
| 2019                       | \$<br>330,273 |
| 2020                       | 211,230       |
| 2021                       | 33,256        |
| 2022                       | 176,852       |

D....

# **NOTE 5 - EMPLOYEE RETIREMENT AND BENEFIT SYSTEMS (Continued)**

#### Annual Pension Cost

During the year ended December 31, 2018, the Road Commission's contributions totaling \$1,065,147 were made in accordance with contribution requirement determined by an actuarial valuation of the plan as of December 31, 2016. The employer contribution rate has been determined based on the entry age normal funding method. Under the entry age normal cost funding method, the total employer contribution is comprised of the normal cost plus the level annual percentage of payroll payment required to normal cost is, for each employee, the level percentage of payroll contribution (from entry age to retirement) required to accumulate sufficient assets at the member's retirement to pay for his projected benefit. Significant actuarial assumptions used include a long-term investment yield rate of 8 percent and annual salary increases of 4.5 percent based on an age-related scale to reflect merit, longevity, and promotional salary increases. The unfunded actuarial liability is amortized as a level percent of payroll on a closed basis. The remaining amortization period is 23 years.

# **NOTE 6 - FEDERAL GRANTS**

The Michigan Department of Transportation (MDOT) requires that all Road Commissions report all federal and state grants pertaining to their county. During the year ended December 31, 2018, the federal aid received and expended by the Road Commission was \$654,441 for contracted projects. Contracted projects are defined as projects performed by private contractors paid for and administrated by MDOT (they are included in MDOT's single audit). Local administered projects are projects where the Road Commissions perform the work and would be subject to single audit requirements if they expended \$750,000 or more. Local projects amounted to \$0.

# NOTE 7 - STATE EQUIPMENT PURCHASE ADVANCE

State equipment purchase advance is determined by a formula applied to the book value of equipment of the previous fiscal year. This amount is adjusted each fiscal year in accordance with the formula and would be refunded to the State Department of Transportation upon termination of the State Highway Maintenance Contract.

# NOTE 8 - LONG-TERM DEBT

The long-term debt of the Road Commission is summarized as follows:

|  | Balance<br>1/01/18 | Addit | ions | Reductions | Balance 12/31/18 | Due<br>Within<br>One Year |
|--|--------------------|-------|------|------------|------------------|---------------------------|

# **NOTE 9 - OTHER POST EMPLOYMENT BENEFITS**

The Otsego County Road Commission provides hospitalization and medical coverage for eligible retirees and their spouses through the Road Commission's group health insurance plan, which covers both active and retired members. The following are the Governmental Accounting Standards Board Statement 74 and 75 required disclosures which have been implemented prospectively by the Road Commission.

• Employees hired prior to December 31, 2008, and retire with 20 years of employment and age 55 years, or greater, will receive health insurance comparable to that provided to the current employees until age 65 years and supplemental health insurance for the employee and spouse for their lifetimes.

The plan does not issue a separate stand-alone financial statement.

*Funding Policy* - Contribution requirements also are negotiated between the Commission and employees. The Commission contributes 100% of the cost for eligible plan members. For fiscal year 2018, the Commission contributed \$520,000 to the plan.

#### Employees Covered by Benefit Terms

As of December 31, 2018, the following employees were covered by the benefit terms:

| Inactive employees or beneficiaries currently receiving benefit payments | 37 |
|--|----|
| Inactive employees entitled to but not yet receiving benefits            | 20 |
| Active employees   | 16 |
| Total participants covered by OPEB Plan                                  | 73 |

*Total OPEB Liability and Trust Assets* - The Road Commission's total OPEB liability of \$6,168,545 was measured as of December 31, 2018, and was determined by an actuarial valuation as of that date.

As of December 31, 2018, there was \$490,210 in assets in the Road Commission's OPEB trust.

*Actuarial assumptions and other inputs* - The total OPEB liability was determined by an actuarial valuation as of December 31, 2018 and the following actuarial assumptions, applies to all periods included in the measurement:

| Inflation                 | Included in investment rate of return  |
|---------------------------|--|
| Salary Increases          | 3.50%  |
| Investment rate of return | 7.00%  |
| Uniform assumption for    |  |
| unfunded period           | 3.00%  |
| Mortality                 | RP–2014 adjusted to 2006 Total Data Set, with MP–2018 mortality improvement. |

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future rates of return (expected returns, net of retirement plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic rates of return for each major asset class included in the retirement plan's target asset allocation are summarized in the following table:

| Asset Class             | Target Allocation | Long-Term Expected<br>Rate of Return |
|-------------------------|-------------------|--------------------------------------|
| Global Equity           | 63.2%             | 8.00%                                |
| Global Fixed Income     | 30.7%             | 5.50%                                |
| Real Assets             | 3.5%              | 6.20%                                |
| Diversifying Strategies | 1.2%              | 2.75%                                |
| Cash                    | 1.4%              | 0.50%                                |

#### **NOTE 9 - OTHER POST EMPLOYMENT BENEFITS (Continued)**

The sum of each target allocation times its long-term expected rate is 7.0%.

*Discount Rate* - The discount rate used to measure the total OPEB liability was 3.40%. The projection of cash flows used to determine the discount rate assumed that Employer contributions of \$400,000 will be made in the next four years. Based on those assumptions, the retirement plan's fiduciary net position was not projected to be sufficient to make all projected future benefit payments of current plan members. For projected benefits that are covered by projected assets, the long-term expected rate was used to discount the projected benefits. From the year that benefit payments were not projected to be covered by the projected assets (the "depletion date"), projected benefits were discounted at a discount rate reflecting the Uniform Assumption for periods in which projected plan assets are not sufficient to make projected benefit payments. A single equivalent discount rate that yields the same present value of benefits is calculated. This discount rate is used to determine the Total OPEB Liability.

| Total                              | <u>\$ 37,919</u>                  | <u> </u>                         |

## **NOTE 9 - OTHER POST EMPLOYMENT BENEFITS (Continued)**

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

| Year Ended December 31: |             |
|-------------------------|-------------|
| 2019                    | \$<br>9,480 |
| 2020                    | 9,480       |
| 2021                    | 9,480       |
| 2022                    | 9,479       |
|                         |             |

# NOTE 10 - COMMITMENTS AND CONTINGENCIES

Grants – The Road Commission has received significant financial assistance from state and federal agencies in the form of various grants. The disbursement of funds received under these programs generally requires compliance with terms and conditions specified in the grant agreement and are subject to audit by the grantor agency. Any disallowed claims resulting from such audits could become a liability of the applicable fund of the Commission.

Risk Management – The Road Commission is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Road Commission was unable to obtain general liability insurance at a cost it considered to be economically justifiable. The Road Commission joined together with other Road Commissions and created a public entity risk pool currently operating as a common risk management and insurance program. The Road Commission pays an annual premium to the pool for its general insurance coverage. The agreement provides that the pool will be self-sustaining through member premiums and will reinsure through commercial companies for claims in excess of \$1,000 (\$2,000 for errors and omissions) for each insured event. The maximum limit of liability for each occurrence is \$10,500,000.

The pooling agreement allows for the pool to make additional assessments to make the pool self-sustaining. The Road Commission is unable to provide an estimate of the amounts of additional assessments.

The Road Commission from time to time is named as a defendant in accident claims and lawsuits requesting damages of various amounts, the majority of which do not state a specific maximum. Insurance coverage related to these claims and lawsuits, if any, is categorized under the general liability insurance program. It is the opinion of management and legal counsel that reasonable estimates of the Road Commission's current liability for these matters, if any, have been recorded.

There are nonaccident liability and condemnation lawsuits sometimes are pending against the Road Commission claiming amounts for damages and relief without stated limitations. It is the opinion of management and legal counsel that reasonable estimates of the Road Commission's current liability for these matters, if any, have been recorded.

## **NOTE 11 - SUBSEQUENT EVENTS**

After fiscal year end, the Road Commission executed equipment purchases amounting to approximately \$288,000. Additionally, the Road Commission remitted approximately \$672,000 in payment of salt barn construction bonds.

# Notes to Schedule:

Actuarially determined contribution rates are calculated as of December 31st, two years prior to the end of the fiscal year in which contributions are reported.

Methods and assumptions used to determine contribution rates:

| Actuarial cost method         | Entry age  |
|-------------------------------|--|
| Amortization method           | Level percentage of payroll, closed  |
| Remaining amortization period | 22 years   |
| Asset valuation method        | 10-years smoothed market   |
| Inflation                     | 2.50%  |
| Salary increases              | 3.75%  |
| Investment rate of return     | 7.75%, net of interest and administrative expense including inflation  |
| Retirement age                | In the 2017 actuarial valuation, expected retirement ages of general employees were adjusted to more closely reflect actual experience |
| Mortality                     | Assumptions were based on the RP2014 Mortality<br>Table - Blended 50% Male / 50% Female  |

| Cost method            | Entry Age Normal (level percentage of compensation) |  |  |  |  |  |  |
| Amortization method    | Level dollar  |  |  |  |  |  |  |
| Asset valuation method | Equal to market value of assets                     |  |  |  |  |  |  |
| Actuarial Assumptions  |   |  |  |  |  |  |  |

## **Actuarial Assumptions**

**Discount rate** - 3.40% for December 31, 2018 liability and 2019 contribution Rationale - Consistent with Uniform Assumptions under Public Act 202 for unfunded plans

Salary scale - 3.50% Rationale - Consistent with Uniform Assumptions under Public Act 202

**Return on plan assets** - 7.00% Rationale - Consistent with plan investment experience

**Mortality rates** - RPH-2014 adjusted to 2006 Total Data Set with MP-2018 mortality improvement Rationale - Contemporary table consistent with Uniform Assumptions under Public Act 202

**Turnover rates** - None Rationale - Small group

**Retirement rates** - 100% at first eligibility Rationale - Consistent with experience

**Utilization** - 100% of eligible employees will elect coverage at retirement Rationale - Benefits are provided at no cost or low cost to retirees

**Marital status** - not applicable Rationale -Future retirees are not eligible for employer paid spouse coverage

# Employee Retirement and Benefit Systems Required Supplementary Information Assumptions and Methods for Calculation of Actuarially Determined Contributions For the Year Ended December 31, 2018

Pre-65 medical claims cost - See monthly rates below

Rationale - Actual age-graded premiums in effect as of January 1, 2019

| Blue Care Network HRA |    |          |  |  |  |  |  |  |
|-----------------------|----|----------|--|--|--|--|--|--|
| Age                   | Pe | r Person |  |  |  |  |  |  |
| 55                    | \$ | 680.64   |  |  |  |  |  |  |
| 56                    |    | 712.08   |  |  |  |  |  |  |
| 57                    |    | 743.82   |  |  |  |  |  |  |
| 58                    |    | 777.70   |  |  |  |  |  |  |
| 59                    |    | 794.49   |  |  |  |  |  |  |
| 60                    |    | 828.37   |  |  |  |  |  |  |
| 61                    |    | 857.67   |  |  |  |  |  |  |
| 62                    |    | 876.89   |  |  |  |  |  |  |
| 63                    |    | 901.01   |  |  |  |  |  |  |
| 64                    |    | 915.65   |  |  |  |  |  |  |

Pre-65 medical claims cost - See monthly rates below

Rationale - Actual premiums in effect as of January 1, 2019

| Coverage          | Per Person   |
|-------------------|--------------|
| Blue Care Network | \$<br>395.82 |
| Humana            | 337.00       |

HRA load - \$4,500 per person pre-65

Rationale - Maximum deductible reimbursement for pre-65 retirees and spouses

# Implicit Subsidy - Not applicable

Rationale - Pre-65 premiums are age-graded so there is no implicit subsidy

# **Medical trend**

Pre-65 - 8.5% graded down to 4.5% by 0.25% per year

Post-65 - 7.5% graded down to 4.5% by 0.25% per year

Rationale - Consistent with Uniform Assumptions under Pubic Act 202

**40% excise tax on "high cost" group health plan** - Premiums when aggregated are projected to exceed the 2022 thresholds; The thresholds were indexed by CPI plus 1.0% in 2023 and CPI only beginning in 2024; The CPI is assumed to be 3.0% in 2023 and following

# **Data Collection**

Date and form of data - All personnel and asset data was prepared by the plan sponsor or a representative and was generally relied upon as being correct and complete without audit by Watkins Ross

# Assumption changes since prior valuation

• First valuation prepared by Watkins Ross

# INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Board of County Road Commissioners Otsego County Road Commission 669 West McCoy Road Gaylord, Michigan 49734

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, major fund and the aggregate remaining fund information of the Otsego County Road Commission (a component unit of Otsego County, Michigan), as of and for the year ended December 31, 2018, and the related notes to the financial statements, which collectively comprise the Otsego County Road Commission's basic financial statements and have issued our report thereon dated May 21, 2019.

# **Internal Control over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the Otsego County Road Commission's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Otsego County Road Commission's internal control. Accordingly, we do not express an opinion on the effectiveness of the Otsego County Road Commission's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings and responses that we consider to be significant deficiencies listed as 2018-001 and 2018-002.

## **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the Otsego County Road Commission's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed one instance of noncompliance or other matters that is required to be reported under *Government Auditing Standards*, and which is described in the accompanying schedule of findings and responses as items 2018-003.

# **Otsego County Road Commission's Response to Findings**

The Otsego County Road Commission's responses to the findings identified in our audit are described in the accompanying schedule of findings and responses. The Otsego County Road Commission's responses were not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

## **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

# Schedule of Findings and Responses For the Year Ended December 31, 2018

# Significant Deficiency - Internal Control

## <u>Preparation of the Financial Statements in Accordance</u> with Generally Accepted Accounting Principles

Finding 2018-001

*Specific Requirement:* Establishment and maintenance of internal control over the financial reporting process as defined by Statement on Auditing Standards Number 115 requires management to prepare annual audit statements in accordance with GASB Statement Number 34. (Audit report format)

*Criteria:* Internal controls should be in place to provide reasonable assurance to the Commission that management reports financial statements (with GASB Statement number 34 formats) necessary to monitor and report annual financial activity without auditor intervention.

*Condition:* Auditor modifies financial statements and footnotes to comply with governmental generally accepted accounting principles.

*Effect:* The effect of this condition places a reliance on the independent auditor as part of the Commission's internal controls over financial reporting.

*Cause:* Change in application of auditing standard.

*Recommendation:* The Commission should consider subcontracting financial statement preparation activities to monitor and report annual financial activity in accordance with GASB Statement Number 34 or train staff to accomplish this element.

*Planned Corrective Action:* In the past, the Board has relied on the auditors for this type of reporting for cost effectiveness. Due to limited resources, management does not wish to allocate additional funds to change this process. Management reviews adjustments for accuracy upon completion and reconciles discrepancies and other disclosures.

• Contact Person(s) Responsible for Correction: Jason Melancon, Manager

# Schedule of Findings and Responses For the Year Ended December 31, 2018

## Significant Deficiency - Internal Control

#### Segregation of Duties

#### Finding 2018-002

*Condition/Criteria:* The Road Commission Finance Director performs several functions of receipting/disbursing (when other personnel are not available), and posting to the general ledger. To provide a system of checks and balances, these functions are generally assigned to separate positions to minimize the potential for unauthorized transactions.

*Effect:* Lack of segregation of duties provides opportunities for inaccurate or unauthorized disbursements or transfers from road funds and increases the potential for inaccurate reporting of account activity.

*Cause:* Sufficient resources and staff are not available to adequately segregate these functions. Additionally, the benefit of separating these duties does not appear to exceed the costs associated with the added personnel.

*Recommendation:* The Board should be aware of the potential weakness in the system and provide appropriate oversight or assistance to personnel when cost beneficial.

*Planned Corrective Action:* The Board has implemented compensating controls to reduce the risks discussed above such as dual signature checks and account reviews.

# Schedule of Findings and Responses For the Year Ended December 31, 2018

Significant Deficiencies – Noncompliance with State Statutes

## Expenditures in Excess of Appropriations—Budgetary Funds

*Criteria*: The expenditures of funds in excess of appropriations are contrary to the provisions of Section 16 of Public Act 2 of 1968, as amended.

*Condition*: Our examination of procedures used by the Road Commission to adopt and maintain operating budgets for the Road Commission's budgetary fund revealed the following instances of noncompliance with the provisions of Public Act 2 of 1968, as amended, the Uniform Budgeting and Accounting Act.

The Road Commission's 2018 General Appropriations Act (budget) provided for expenditures of the General Fund to be controlled to the activity level. As detailed, actual 2018 expenditures exceeded the board's approved budget allocations for some general fund activities.

During the fiscal year ended December 31, 2018, expenditures were incurred in excess of amounts appropriated in the amended budgets for the General Fund as listed on page 44 of the financial statements.

*Effect*: Condition's may violate State Law.

Cause: Unknown.

*Recommendation*: We recommend that the Road Commission's chief administrative officer and personnel responsible for administering the activities of the various funds of the Road Commission, develop budgetary control procedures for the General Fund which will assure that expenditures do not exceed amounts authorized in the General Appropriations Act, or amendments thereof.

*Planned Corrective Action*: Amounts will be maintained in the future. Most of the expenditure variance was related to projects reported to the Road Commission subsequent to year end. We do not anticipate this circumstance in the future.

# COMMUNICATION WITH THOSE CHARGED WITH GOVERNANCE

Board of County Road Commissioners Otsego County Road Commission 669 West McCoy Road Gaylord, Michigan 49734

We have audited the financial statements of the governmental activities, major fund and the aggregate remaining fund information of the Otsego County Road Commission (a component unit of Otsego County, Michigan) for the year ended December 31, 2018, and have issued our reports thereon dated May 21, 2019. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards and *Government Auditing Standards* as well as certain information related to the planned scope and timing of our audit. Professional standards also require that we communicate to you the following information related to our audit.

## Our Responsibility under U.S. Generally Accepted Auditing Standards and Government Auditing Standards

As stated in our engagement letter dated March 15, 2019, our responsibility, as described by professional standards, is to express opinions about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects, in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management of your responsibilities.

As part of our audit, we considered the internal control of the Otsego County Road Commission. Such considerations were solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of the Otsego County Road Commission's compliance with certain provisions of laws, regulations, contracts, and grants. However, the objective of our tests was not to provide an opinion on compliance with such provisions.

Generally accepted accounting principles provide for certain required supplementary information (RSI) to supplement the basic financial statements. Our responsibility with respect to the management's discussion and analysis, schedule of funding progress, and budgetary comparison schedules, which supplement the basic financial statements, is to apply certain limited procedures in accordance with generally accepted auditing standards. However, the RSI will not be audited and, because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance, we will not express an opinion or provide any assurance on the RSI.

Otsego County Road Commission Page 2

We have been engaged to report on other schedules which accompany the financial statements but are not RSI. Our responsibility for this other information, as described by professional standards, is to evaluate the presentation of the other information in relation to the financial statements as a whole and to report on whether the other information is fairly stated, in all material respects, in relation to the financial statements as a whole.

#### Planned Scope and Timing of the Audit

We performed the audit according to the planned scope and timing previously communicated to you in your March 2019 Board Packet.

## **Significant Audit Findings**

Management is responsible for the selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we will advise management about the appropriateness of accounting policies and their application. The significant accounting policies used by the Otsego County Road Commission are described in Note 1 to the financial statements. One new accounting policy was adopted regarding GASB Statement Number 75 and the application of existing policies was not changed during the fiscal year. We noted no transactions entered into by the Road Commission during the year for which there is a lack of authoritative guidance or consensus. There are no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the financial statements were:

- Management's estimate of the depreciation expense is based on estimated lives. We evaluated the key factors and assumptions used to develop the estimate to determining that it is reasonable in relation to the financial statements taken as a whole.
- Management's estimate of the vested employee benefits is based on current hourly rates and policies.
- Management's estimate of the amounts for OPEB liabilities and Pension liabilities and investments were based on various assumptions regarding life expectancies, inflation, premium increases, and investment rates.

The financial statement disclosures are neutral, consistent and clear.

## **Difficulties Encountered in Performing the Audit**

We encountered no significant difficulties in dealing with management in performing and completing our audit.

## **Corrected and Uncorrected Misstatements**

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. In addition, there were no misstatements detected as a result of audit procedures and corrected by management that were material, either individually or in the aggregate, to the financial statements taken as a whole. A copy of any adjustments are available from management.

## **Disagreement with Management**

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

#### **Management Representations**

We have requested certain representations from management that are included in the management representation letter dated May 21, 2019.

## **Management Consultations with Other Independent Accountants**

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us as to determine the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

## **Other Audit findings or Issues**

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

#### **Comments and Recommendations**

## **Excess Expenditures Over Appropriations (Prior)**

Public Act 621 of 1978, Section 18(1), as amended, provides that a local unit of government shall not incur expenditures in excess of the amount appropriated. In the body of the financial statements, the Road Commission's actual expenditures were in excess of amounts appropriated for certain line items as indicated on the Statement of Expenditures – Budget and Actual.

Status: Some items were over due to unanticipated billings after year end.

## Parts Management (Prior)

HMS software utilized by the Road Commission has a parts management module which would assist in the purchasing, inventory, and usage reporting of parts and other nonstock inventory items. Implementation of this software would increase internal control over parts management and eliminate redundant inventory procedures currently in practice. We strongly recommend the implementation of inventory software.

We reviewed parts and other material for obsolete items. Our procedures indicated that approximately 80 percent of items have not changed over a two year period which may indicate items should be scrapped or charge out processes are incomplete or pricing errors. The Road Commission should conduct a review of parts and handling costs and reduce theft risk.

Status: Unchanged.

# **Other Postemployment Benefits (Prior)**

In June 2015, the Governmental Accounting Standards Board issued Statement Number 75 – "Financial Reporting for Postemployment Benefits Other Than Pensions." The standard addresses how to measure long-term liabilities and annual costs of Other Postemployment Benefits (OPEB) for the purposes of reporting them in the financial statements. The standard does not apply to how a governmental unit should fund future OPEB payments, however. The standard makes significant changes which will increase the liability and may adjust annual OPEB expense as well. A net OPEB liability will be reported in the employer's statement of net position which could amount to a significant increase than past amounts reported. The OPEB expense will also be significantly more volatile, since there will likely be two sets of calculations for expense and funding. Additionally, changes in methods and assumptions used in the actuarial calculations, more extensive footnote disclosures and required supplementary information will be needed.

The standard is effective for fiscal years beginning after June 15, 2017. We encourage the Board and management to review the provisions of this new standard and anticipate its effect on the financial reporting process.

Status: Corrected.

## Single Approach for Reporting Leases (Prior Year)

The Governmental Accounting Standards Board (GASB) issued guidance that establishes a single approach to accounting for and reporting leases by state and local governments. The single approach is based on the principle that leases are financing of the right to use an underlying asset.

GASB Statement No. 87, *Leases*, provides guidance for lease contracts for nonfinancial assets – including vehicles heavy equipment, and buildings – but excludes nonexchange transactions, including donated assets, and leases of intangible assets.

Under the new Statement a lessee government is required to recognize (1) a lease liability and (2) an intangible asset representing the lessee's right to use the leased asset. A lessor government is required to recognize (1) a lease receivable and (2) a deferred inflow of resources. A lessor will continue to report the leased asset in its financial statements.

A lease also will report the following in its financial statements:

- Amortization expense for using the lease asset (similar to depreciation) over the shorter of the term of the lease or the useful life of the underlying asset.
- Interest expense on the lease liability
- Note disclosures about the lease, including a general description of the leasing arrangement, the amount of the lease assets recognized, and a schedule of future lease payments to be made.

Limited exceptions to the single-approach guidance are provided for:

- Short-term leases, defined as lasting a maximum of 12 months at inception, including any options to extend.
- Financial purchases
- Certain regulated leases, such as between municipal airports and air carriers.

The full text of Statement 87 is available on the GASB website, www.gasb.org.

Status: To be implemented by 2020.

# **Prepaid Items**

Although the ledger contains twelve months of financial activity, the Board should enact accounting procedures to identify prepaid expense items such as health insurance and liability coverage. Amortization of these costs should be posted to proper periods of coverage in accordance with accounting principles.

## **Employee Withholding Forms**

Due to the significant changes recently enacted with the 2018 Tax Cuts and Jobs Act, the Board should consider having employees update their Form W4 – Employee's Withholding Allowance Certificate. Tax rate, credit and deduction changes have impacted federal income tax withheld from gross pay.

# Public Act 202 of 2017

Public Act 202 of 2017 required local units of government with employee retiree healthcare plans to provide adequate funding. The Road Commission established a retiree healthcare program which is not adequately funded at 40% of the actuarially determined total liability. The Road Commission is not in compliance with the statute and must receive an approved waiver from the Michigan Department of Treasury or adequately fund this plan.

# GASB 83 – Certain Asset Retirement Obligations

*Effective 06/15/19 (your FY 2019)* 

This statement addresses accounting and financial reporting for certain asset retirement obligations—legally enforceable liabilities associated with the retirement of a tangible capital assets.

## GASB 84 – Fiduciary Activities

*Effective 12/15/2019 (your FY 2019)* 

This standard establishes new criteria for determining how to report fiduciary activities in governmental financial statements. The focus is on whether the government is controlling the assets, and who the beneficiaries are. Under this revised standard, certain activities previously reported in agency funds may be reclassified in future periods. Due to the number of specific factors to consider, management should assess the degree to which this standard may impact the Road Commission.

## **Other Matters**

We applied certain limited procedures to the management's discussion and analysis, schedule of funding progress, and budgetary comparison schedules, which is required supplementary information (RSI) that supplements the basic financial statements. Our procedures consisted of inquires of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquires, the basic financial statements, and our knowledge we obtained during our audit of the basic financial statements. We did not audit the RSI and do not express an opinion or provide any assurance on the RSI.

We were engaged to report on the other schedules which accompany the financial statements but are not RSI. With respect to this other information, we made certain inquires of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the other information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.
